## **GSIB Adds Energy Efficient Presses**

By: Terry Cundiff, Vice President

December 31, 2018

**Bassett, VA** - GS Industries of Bassett, Ltd. is pleased to announce the addition of two new LS Mtron energy efficient injection molding presses to its press fleet. The company recently installed a "WIZ390E", a 390 ton all-electric machine and "TheONE 550", a 550 ton hybrid machine.

The 390 shot size is 38.2 ounces, mold space is 36.2 x 31.9 inches, daylight min/max is 14.0/61.0, platen width is 51.2 and knockout pattern is 4x16, 6x28.

The 550 shot size is 64 ounces, mold space is 32.3 x 32.3 inches, daylight min/max is 13.8/55.9, platen width is 45.3 and knockout pattern is 4x16, 6x28.

With the addition of the two new presses, GSIB now has injection-molding presses ranging in size from **220 tons to 1500 tons, with shot sizes from 20 ounce to 225 ounces**, giving them the capability to serve a wide variety of markets and industries. In 2018 GSIB also invested in a total facility roof replacement, another energy efficient move that will continue to support the environment and maintain the facility to help ensure the success of their customers. Distribution services and inventory solutions for customer products help their customers remain competitive in the global economy. Specs for all our presses can be found at <http://gsib.com/documents/PressList.pdf>

**ABOUT GS Industries of Bassett, Ltd.** GS Industries of Bassett, Ltd. is an injection molder producing products to our customers specification for the appliance, furniture, home-décor, construction, textile, carpet and other industries and two proprietary plastic injection molded product lines, Textube and Underground Products.
